DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Aoyama et al. P.N. 5,848,329 (Aoyama).

Aoyama discloses an image forming apparatus. The image forming apparatus includes as most clearly shown in Fig. 27 a number of process units such as 102. Each process unit corresponding to different colors includes a photoconductive element in the form of a drum. The photoconductive element is stored in a housing that features complementary or mating guide rails 217 and 218. See col. 16 lines 12-32. Note that each process unit or cartridge is insertable into the image forming apparatus in the axial direction as described in col. 15 lines 55-64. Aoyama meets all the limitations of the claims at issue.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kojima et al. and Amitani et al. disclose image forming apparatus having specific structure for the placement of process units. Note the abstract of each disclosure. Note also the indexing scheme of Amitani et al. in particular.
